PROJECTS

MVC Online Commercial Automation Aug 2026 – Present

ASP.NET MVC, Entity Framework (Code First), MS SQL Server

- Built a full-stack commercial automation system with separate admin and customer panels.
- Implemented product, sales, invoice and shipment management modules and a statistics dashboard.
- Added Forms Authentication and a customer messaging feature.

Personal Resume Website with Admin Panel Oct 2026 – Present

ASP.NET MVC 5, Entity Framework 6, MS SQL Server · github.com/Sercansoy/cv-website

- Designed a database-driven resume site; all content is managed through a secured admin panel (CRUD for 7 entities).
- Applied security practices: BCrypt password hashing, 15-minute login lockout after 5 failed attempts, CSRF tokens, global authorization filter, POST-only deletes and Razor output encoding.
- Added a contact form with spam protection and an admin inbox for visitor messages.
- Structured the data layer with a generic repository pattern and EF Code First migrations.

Passaparola Word Puzzle Game Jun 2026 – Present

C#, Windows Forms

- Developed a desktop word puzzle game with letter-matching logic, dynamically generated UI controls and score tracking.
